BRIDGING THE BORDERS BETWEEN

Current COVID-19 Statistics as of 15-May, 2021

38554

RECORDED CASES

36318

RECOVERED

1582

DEATHS

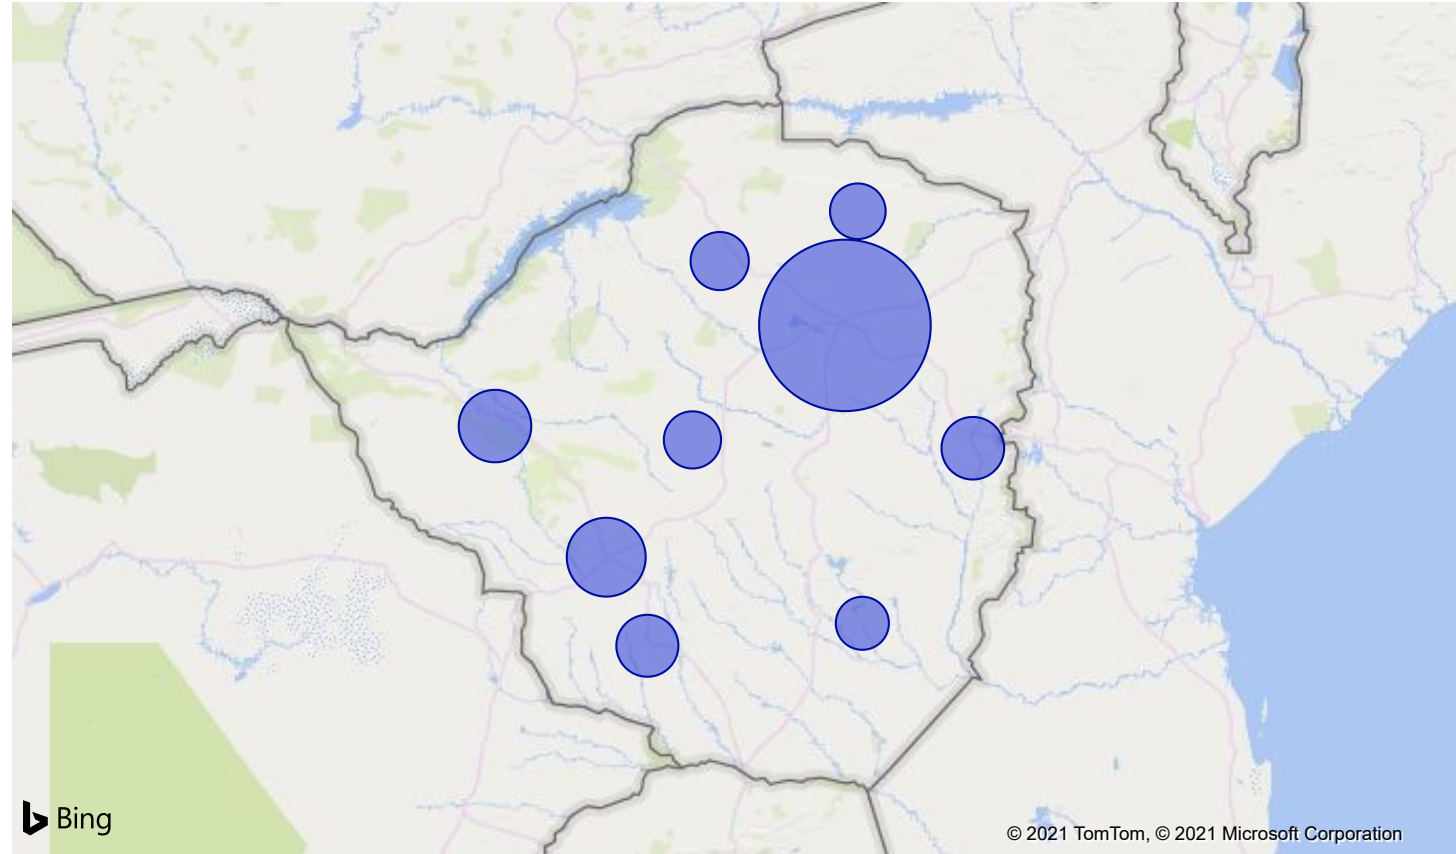

654

ACTIVE CASES

ACTIVE_CASES by PROVINCE

ACTIVE_CASES by Province

Active cases keep fluctuating over time. Harare still remains the Province with the most COVID-19 Infected patients (above 300) who are still active. The other remaining Provinces have an almost equally distributed portion of Active Cases across the country (all less than 100).

Mashonaland East Province is the ONLY Province WITHOUT a single COVID-19 patient within the country.

Active Cases might be on the increase in the next coming weeks due to the outbreak and wide spread of Cases coming from India. As more Zimbabweans come in from the country, the chances of an increase in cases within the country are also high.

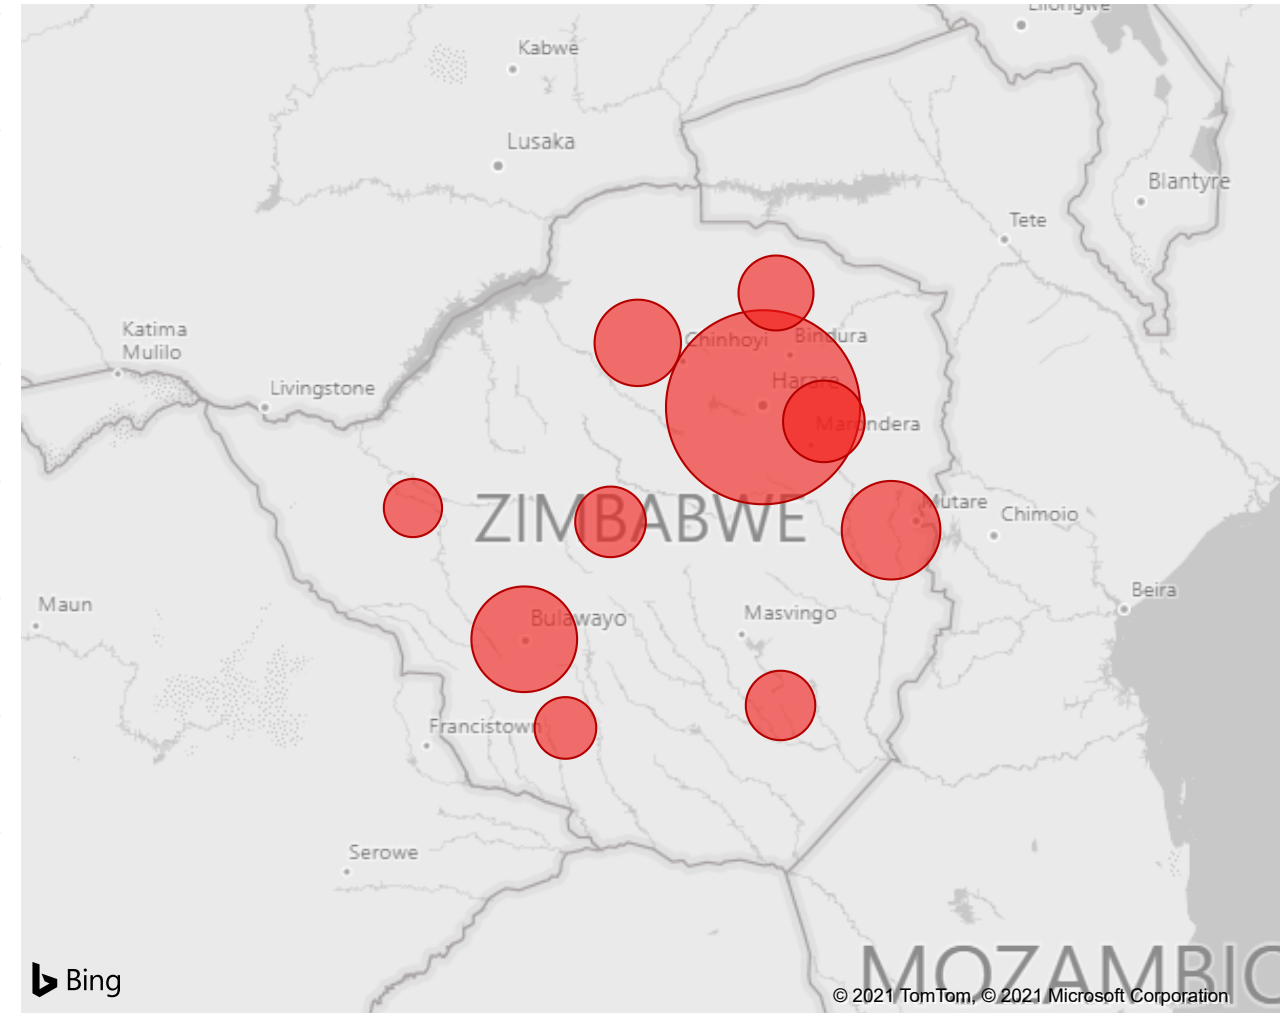

Refer to Histogram above for distribution per each Province within the country.

Cases, Recoveries & Deaths per Province

KEY ● Total Recorded Cases ● Recovered ● Deaths

Deaths by Province

The number of recorded cases, recoveries and deaths per Province

Harare has more than any other province, recorded more figures in each of the categories displayed above (total cases, recoveries and deaths) throughout this COVID-19 pandemic.

The gap between Recorded Cases and Recoveries has been narrowing, showing signs of recovery in most parts of the country. However, over the last month the gap has been fluctuating due to some new cases showing up in regions like Harare and Bulawayo.

New_Cases, Recovered and Deaths by Date within the last 7-Days

KEY ● New Cases ● Recovered ● Deaths

The last 7-day cases trend within the Country.

The number of recoveries have been consistent with the number of new cases being recorded on a daily basis.

Number of deaths has remained at an average rate of 1 death per day.

Daily New Cases Trend

Daily new cases trend indicator graph from March 2020.

The daily new cases have been steady for the period beginning March 2021 to date. However there was a sudden small spike witnessed at the end of April which were cases from clusters (schools and community settlements) recorded within the country.

Deaths by Date

The graph indicates the death trend in Zimbabwe since July 2020

The number of deaths recorded on a single day have maintained a steady rate over the last month.

Cumulative Postive Cases, Recoveries and Deaths by Date

*The cumulative curve for positive cases and deaths has flattened.
Indications of the COVID-19 situation in Zimbabwe being stable.*

Recovery Ratio

The Recoveries, Deaths and Local & Imported Case Ratios in Zimbabwe.

Total Number of Cases recorded in the country being the common denominator in the scenarios.

Deaths Ratio

Local Infections and Foreign Infections

ABOUT DATA

The statistical data compiled in this report is based on the daily COVID-19 report compiled and published by the Ministry of Health & Child Care through their twitter platform. You can also verify the statistics by viewing on the Ministry of Health & Child Care website. We have also kept an online repository of COVID-19 data which is updated on a daily basis the next morning after every publication.

The data can be found using the following link: <https://github.com/African-SurveyorsConnect/Zimbabwe-COVID-19-Data>
Anyone is free to use the data for research and dissemination purposes after agreeing to the terms of usage which are stated in the README file within the online GitHub repository.

CONTACTING US

Anyone who would like to contact us can do so only through WhatsApp and Email using the details below:
