## DISTRIBUTION OF ACTIVE CASES AS OF 20-NOVEMBER-2020

Bar Chart of COVID-19 RECORDS PER PROVINCE

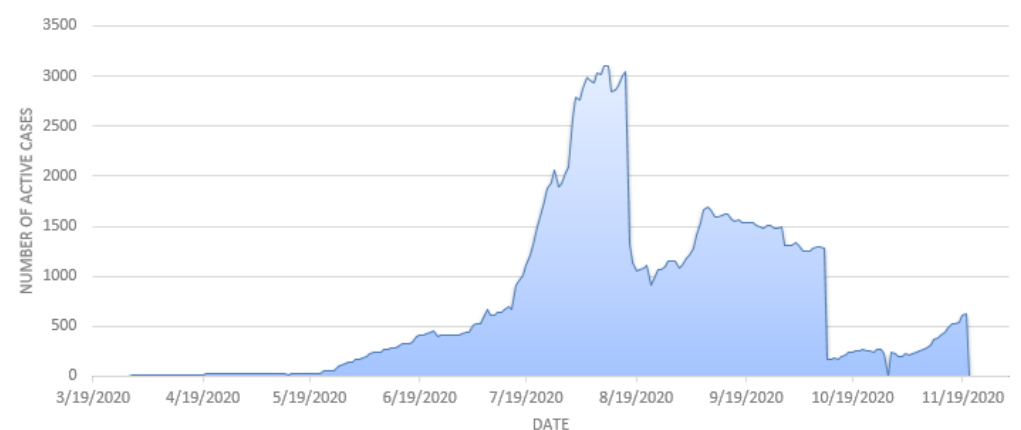

Distribution of Active Cases at Provincial level in Zimbabwe as of 20-November-2020.

COVID-19 Active Cases have increased over the past two weeks. Initially the number of remaining (active) cases was below 300 as of 1-November-2020. Today the total number of Active Cases stands at 626.

Bulawayo and Matebeleland North have seen more cases coming up over the past two weeks. Harare Province which used to be at the top is now ranking 3rd as we expect more recoveries coming from the Province shortly and a decrease in daily cases.

Other Provinces remain stable as most activity is being experienced in the Western parts of the country.

ACTIVE CASE ACTIVITY

BRIDGING THE BORDERS BETWEEN

As shown by the series chart above, Active Cases are beginning to rise after having faced a magnificent decrease over the last month.
