BRIDGING THE BORDERS BETWEEN

Current COVID-19 Statistics as of 03 April, 2021

36911

RECORDED CASES

34732

RECOVERED

1524

DEATHS

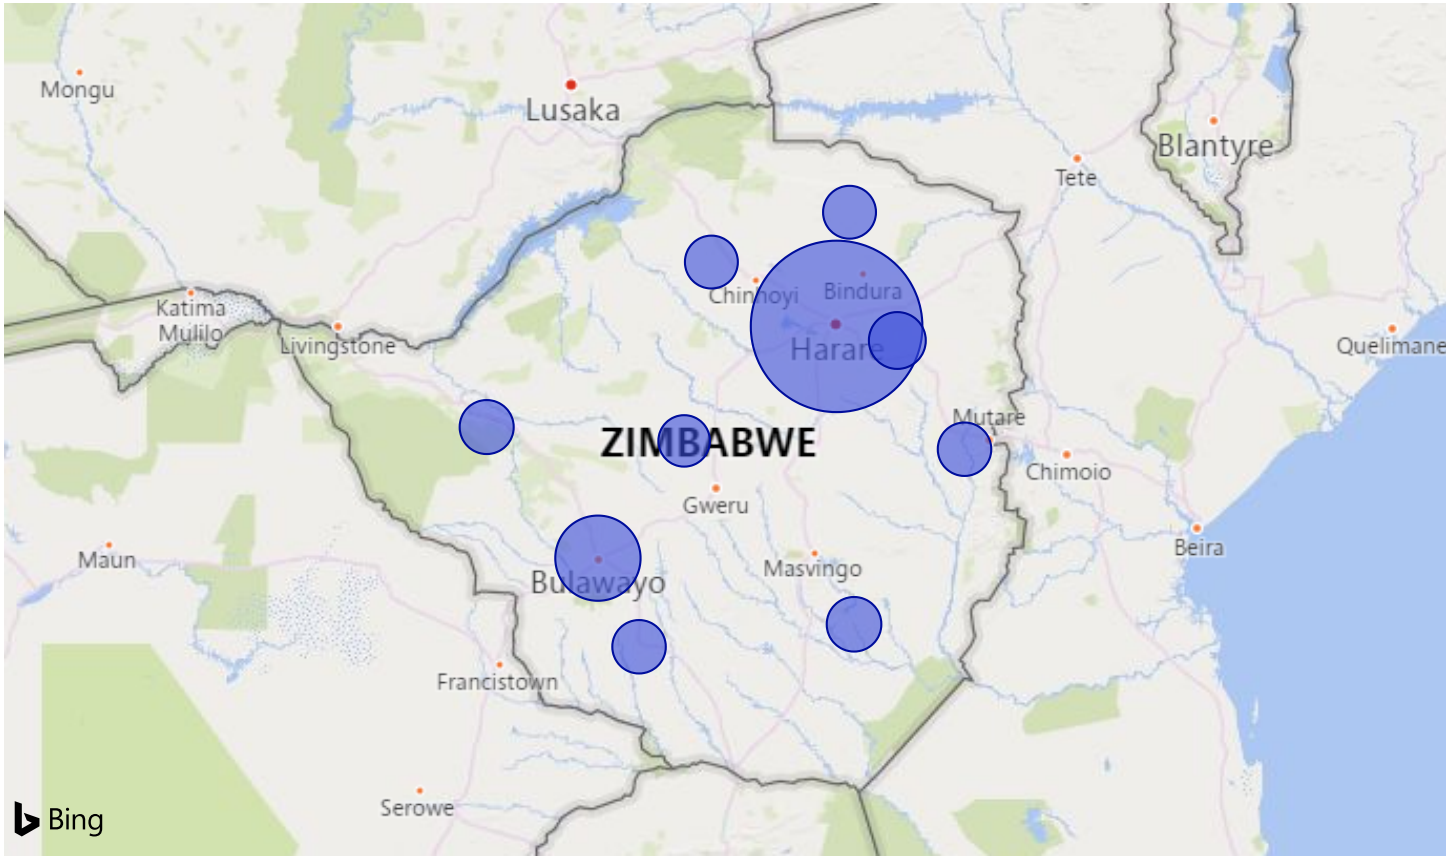

655

ACTIVE_CASES

ACTIVE_CASES by PROVINCE

ACTIVE_CASES by Province

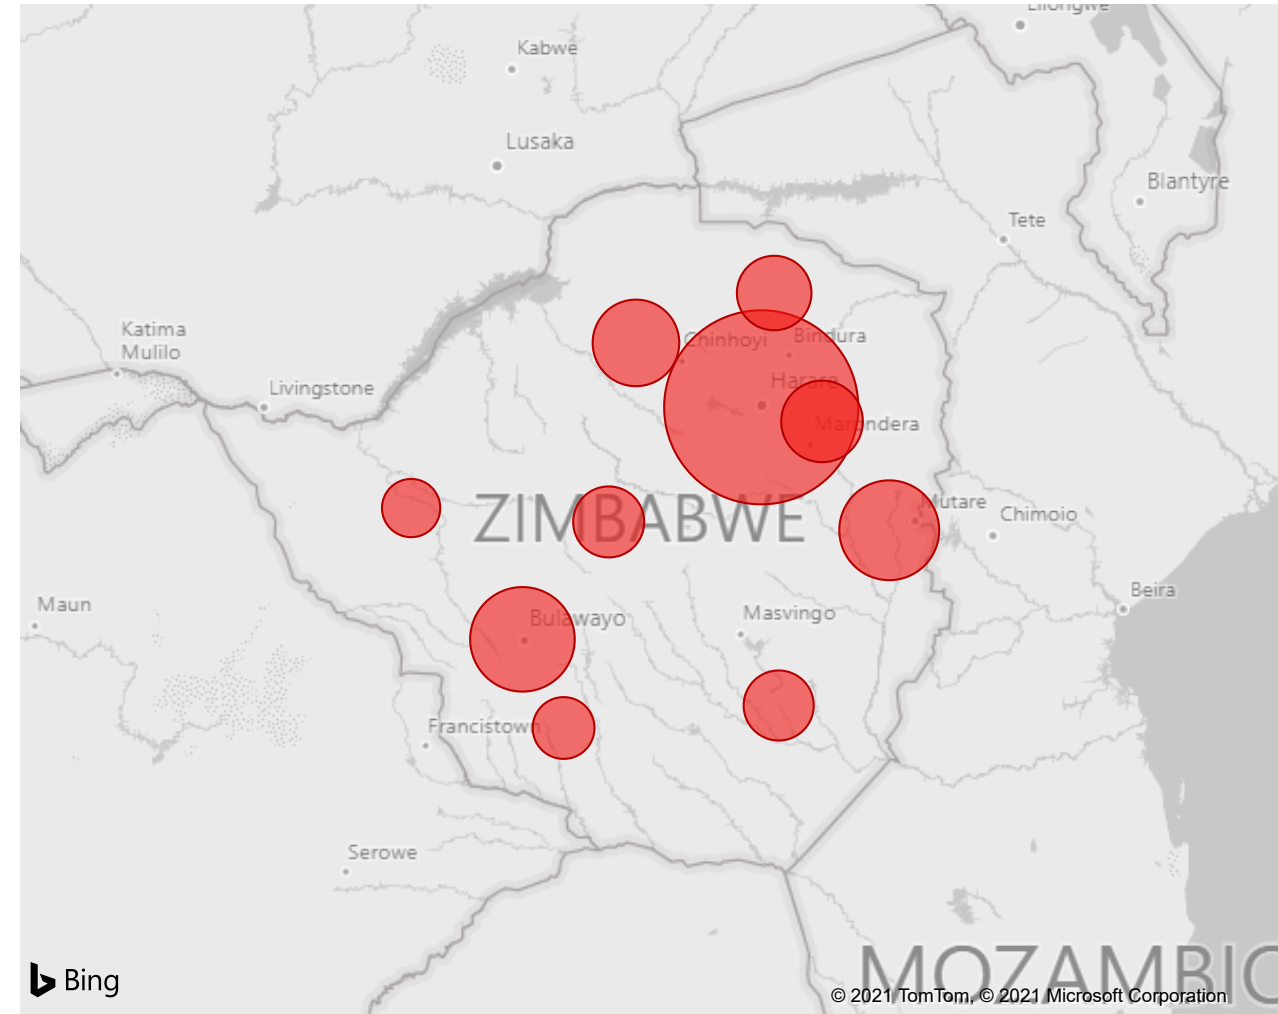

Active cases have maintained a steady figure since our last publication and analytical report (2-weeks ago). Harare still remains with over 400 active cases. 8 out of the 10 Provinces have active cases ranging below 50. Most parts of the country have recovered from COVID-19 while the two major provinces/cities still have a fairly high number of active cases. Refer to Histogram above for distribution per each Province within the country.

Cases, Recoveries & Deaths per Province

KEY ● Total Recorded Cases ● Recovered ● Deaths

Deaths by Province

The number of recorded cases, recoveries and deaths per Province

Harare has more than any other province, recorded more figures in each of the categories displayed above (total cases, recoveries and deaths) throughout this COVID-19 pandemic.

The gap between Recorded Cases and Recoveries has been narrowing, showing signs of recovery in most parts of the country. However, over the last two-weeks the gap has been fluctuating due to some new cases showing up in regions like Harare and Bulawayo.

New_Cases, Recovered and Deaths by Date within the last 7-Days

KEY ● New_Cases ● Recovered ● Deaths

The last 7-day cases trend within the Country.

The number of recoveries have maintained a higher record than new cases over the last 7 days.

Number of deaths has remained at an average rate of 1 death per day over the past week.

Recoveries kept occurring in most regions of the country resulting in 8 of 10 provinces having remained with less than 50 active cases.

Daily New Cases Trend

Daily new cases trend indicator graph from July 2020.

The daily new cases have been steady for the period beginning March 2021 to date. As the country continues to recover from the pandemic, cases are likely to maintain the current trend for the next couple of weeks.

Deaths by Date

The graph indicates the death trend in Zimbabwe since July 2020

The number of deaths recorded on a single day have maintained a steady rate over the last weeks.

Cumulative Postive Cases, Recoveries and Deaths by Date

*The cumulative curve for positive cases and deaths has flattened.
The recovery trend is also beginning to flatten as the days go by.*

Recovery Ratio

The Recoveries, Deaths and Local & Imported Case Ratios in Zimbabwe.

Total Number of Cases recorded in the country being the common denominator in the scenarios.

Deaths Ratio

Local & Imported Case Ratio

ABOUT DATA

The statistical data compiled in this report is based on the daily COVID-19 report compiled and published by the Ministry of Health & Child Care through their twitter platform. You can also verify the statistics by viewing on the Ministry of Health & Child Care website. We have also kept an online repository of COVID-19 data which is updated on a daily basis the next morning after every publication.

The data can be found using the following link: <https://github.com/African-SurveyorsConnect/Zimbabwe-COVID-19-Data>
Anyone is free to use the data for research and dissemination purposes after agreeing to the terms of usage which are stated in the README file within the online GitHub repository.

CONTACTING US

Anyone who would like to contact us can do so only through WhatsApp and Email using the details below:
