BRIDGING THE BORDERS BETWEEN

Current COVID-19 Statistics as of 21 March, 2021

36662

RECORDED CASES

34257

RECOVERED

1510

DEATHS

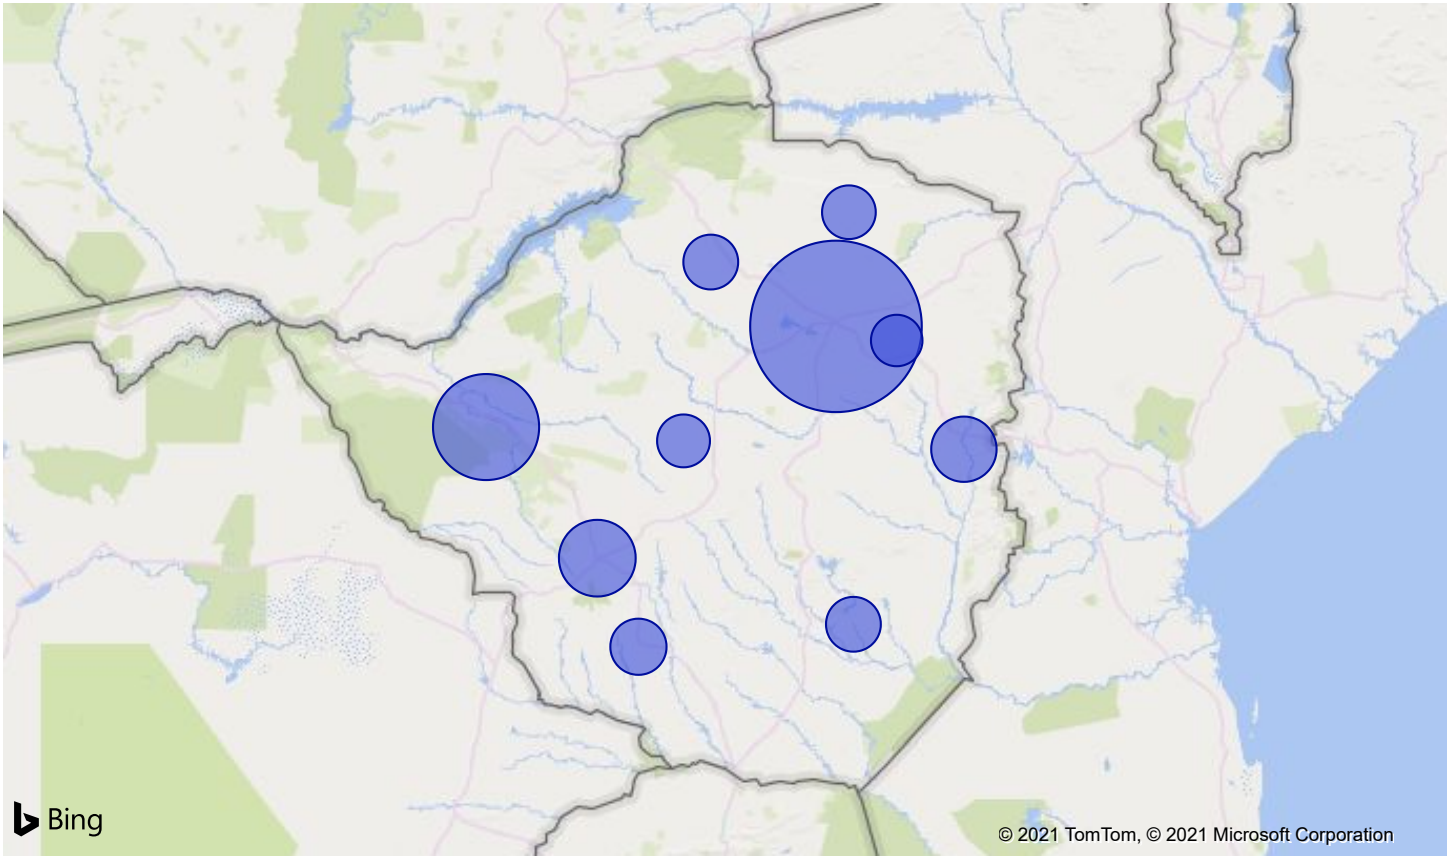

895

ACTIVE_CASES

ACTIVE_CASES by PROVINCE

ACTIVE_CASES by Province

Active cases have maintained a steady figure since our last publication and analytical report (2-weeks ago). Harare still remains with over 400 active cases. Other provinces have managed to witness some recoveries over the weeks resulting in the reduction of active cases.

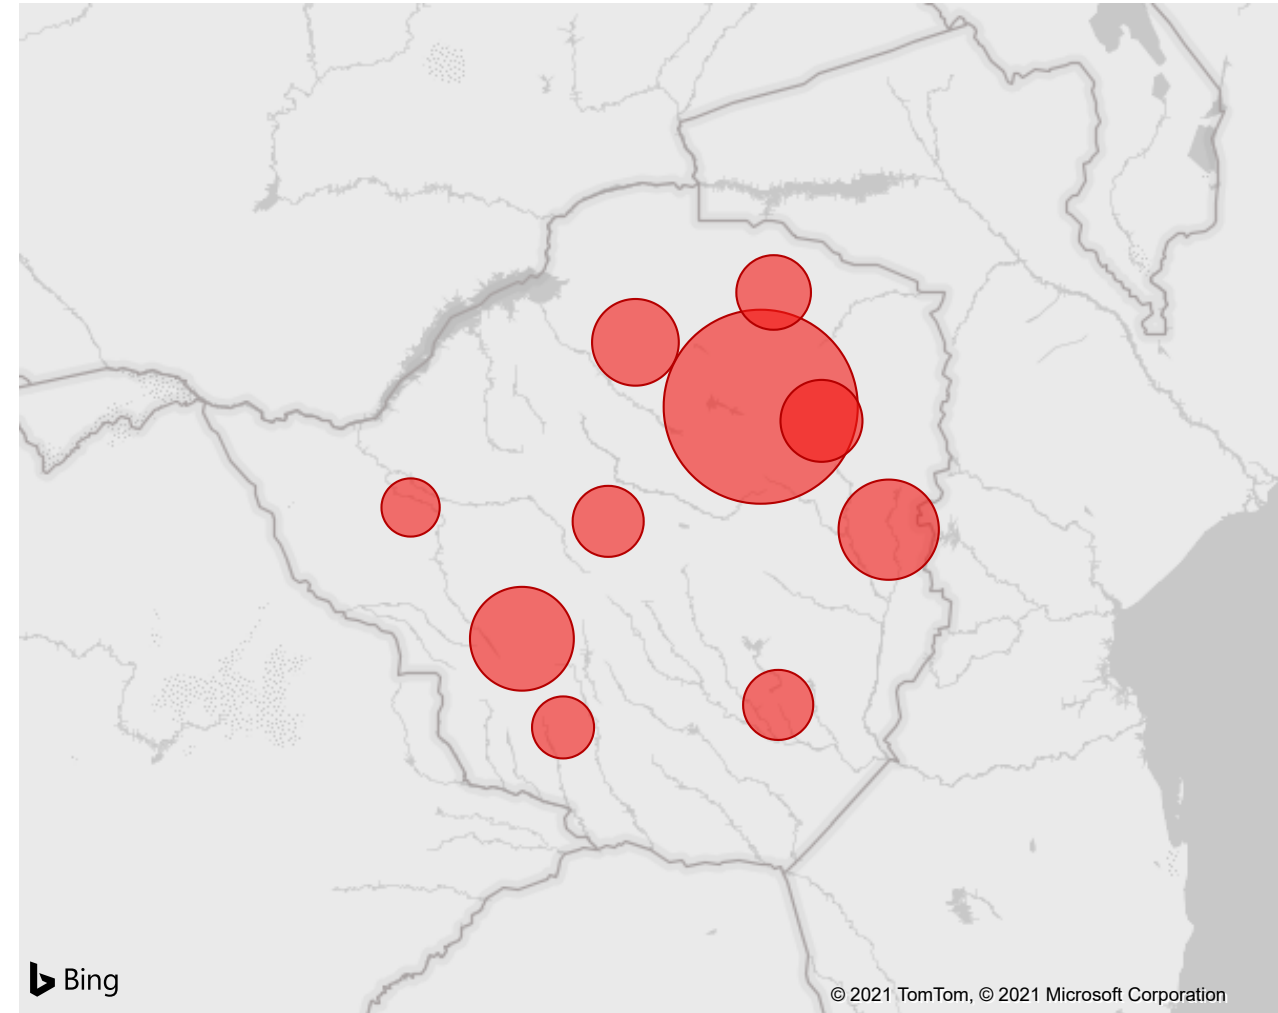

Refer to Histogram above for distribution per each Province within the country.

Cases, Recoveries & Deaths per Province

KEY ● Total Recorded Cases ● Recovered ● Deaths

Deaths by Province

The number of recorded cases, recoveries and deaths per Province

Harare has more than any other province, recorded more figures in each of the categories displayed above (total cases, recoveries and deaths) throughout this COVID-19 pandemic.

The gap between Recorded Cases and Recoveries has been narrowing, showing signs of recovery in most parts of the country. However, over the last two-weeks the gap has been fluctuating due to some new cases showing up in regions like Harare and Bulawayo.

Harare has recorded the most cases per Capita than the rest of the Provinces.

The point representation sizes depict the deaths per Capita for each province in the country, where a bigger circle represents more deaths and a smaller circle represents less deaths per capita for that region.

Most regions with a higher rate of cases per capita also correspond with the deaths per capita indicating a relationship between the two.

New_Cases, Recovered and Deaths by Date within the last 7-Days

KEY ● New_Cases ● Recovered ● Deaths

The last 7-day cases trend within the Country.

The number of new cases have been fairly higher than the recoveries in most instances over the last couple of days.

Number of deaths has remained at an average rate of 2 deaths per day over the past week.

Recoveries kept occurring in most regions of the country.

Daily New Cases Trend

Daily new cases trend indicator graph from July 2020.

The daily new cases have been steady for the period beginning March 2021 to date. A few spikes have occurred from time to time within the period. Over the last couple of days, cases have taken a slight upward trend with fears of a 3rd wave of the virus in the country.

Deaths by Date

The graph indicates the death trend in Zimbabwe since July 2020

The number of deaths recorded on a single day have lowered from the previous weeks rates.

Cumulative Postive Cases, Recoveries and Deaths by Date

*The cumulative curve for positive cases and deaths has flattened.
The recovery trend is also beginning to flatten as the days go by.*

Recovery Ratio

The Recoveries, Deaths and Local & Imported Case Ratios in Zimbabwe.

Total Number of Cases recorded in the country being the common denominator in the scenarios.

Deaths Ratio

Local & Imported Case Ratio

ABOUT ZIMBABWE'S VACCINATION PROGRAM

The vaccination program was officially launched on the 18th of February 2021 where the Vice President who is also the Minister of Health & Child Care of Zimbabwe received the first dosage of the COVID-19 Sinopharm vaccine which was from the People's Republic of China.

The Ministry of Health & Child Care has also announced that the vaccination program in Zimbabwe will be broken down into 3 phases. See the phases and descriptions below:

Phase 1 - population at risk

*Stage I

Frontline Workers (e.g Health Workers, Ports of Entry Personnel ZIMRA, Immigration Customs, Security and others)

*Stage II

VHW, Chronic Illness, Elderly Population > 60 years, Inmates, Prison Population and others in confined settlements including Tongogara Refugee Camp.

Phase 2 - Lecturers, all school staff population and other staff at medium risk depending with the epidemiological picture of the disease.

Phase 3- Population at low risk.

.

42210

Partial Series

Vaccinations By Day

The full series vaccinations began in the last few days, however we haven't managed to obtain such data at the time of this report.

Key Terms:

Partial Series - vaccinated candidates for the 1st dosage

Full Series - candidates who have received the 2nd dosage (as required per vaccine)

ABOUT DATA

The statistical data compiled in this report is based on the daily COVID-19 report compiled and published by the Ministry of Health & Child Care through their twitter platform. You can also verify the statistics by viewing on the Ministry of Health & Child Care website. We have also kept an online repository of COVID-19 data which is updated on a daily basis the next morning after every publication.

The data can be found using the following link: <https://github.com/African-SurveyorsConnect/Zimbabwe-COVID-19-Data>
Anyone is free to use the data for research and dissemination purposes after agreeing to the terms of usage which are stated in the README file within the online GitHub repository.

CONTACTING US

Anyone who would like to contact us can do so only through WhatsApp and Email using the details below:
